

Cinical Data Capture Made Easy

Your web-based software solution for the simple, cost-efficient and data protection compliant execution of clinical studies and PMCF for the EU MDR.

Connect all involved parties in a single platform

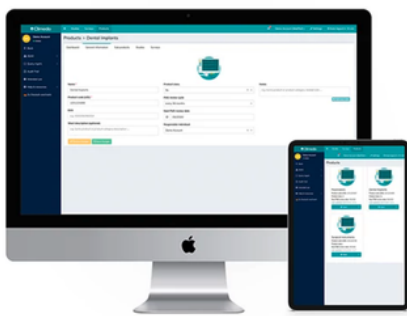

Save valuable time and costs

Gain new competitive advantages

Effortless Data Collection for the EU MDR

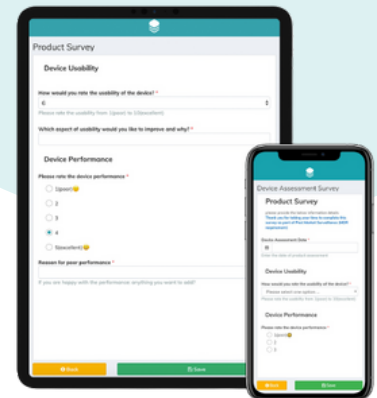

Product Registry

Set up your products according to category and device class, and connect your PMCF activities with the corresponding devices. Track the status of your proactive PMS for each product each product and product category.

Studies (eCRF, ePRO) and Surveys (eSurveys)

Whether you're conducting a clinical validation study, an observational study or PMCF – Climedо lets you conduct them easily and cost-efficiently. Collect valuable product feedback from customers and users. Data capture becomes smooth and easy by sending a survey link to users or by using QR codes.

Reports and Dashboards

Stay on top of things: Intuitive data visualizations and flexible dashboards give you a comprehensive overview of all study progress as well as real-time insights into the status of your PMCF activities. As a result, you and your team can always react to any events in a timely manner.

Happiness Guaranteed

"We were looking for a new system with an eDiary function. Thanks to Climedo's quick and flexible support, we were able to start our study in a short period of time. We're planning to conduct further studies with this system."

Dr. Jens Milde,
Managing Director, Pharmalog Institute for Clinical Research

"To me, Climedo is the perfect combination of simplicity and functionality."

Prof. Dr. Christoph Schmitz
Chief Medical Officer, Auto Tissue Berlin

"As an established practitioner, I appreciate the ingenuity of intuitive usability and use Climedo's tools to improve the quality of my operational activities. It's fast, simple, effective - exactly what we need in practice."

Dr. med. dent. Wolfgang Maas
Oral Surgeon, Implantology Practice
